Aims and Scope Series A

Journal of Mathematical Sciences Series A includes direct submissions. All direct submissions will be reviewed by an international Editorial Board led by prominent experts in the field and accepted papers will receive professional copyediting. The submitted articles must be written in English and should be in the broad focus of the journal which can be expressed in the sentence "Mathematical analysis in a broad sense". This means that primarily the Editorial Board is interested in manuscripts in the following fields of study: Mathematical analysis: real and complex variable methods; Ordinary and Partial differential equations; Fractional integrodifferentiation and applications; Mathematical physics; Function theory; Functional analysis; Applied analysis; Dynamical systems; Approximations; Optimization and Optimal Control; Harmonic analysis: real and complex variable methods; Operator theory; Applied harmonic analysis; Analytical methods in probability theory and Mathematical statistics; Mathematical biology; and applications of fields close or related to harmonic analysis, PDE's, Machine learning, neural networks and other fields mentioned above.
